

December 15, 2017

The Honorable Paul Ryan
Speaker, U.S. House of Representatives
Washington, DC 20515

The Honorable Nancy Pelosi
Minority Leader, U.S. House of Representatives
Washington, DC 20515

Dear Speaker Ryan and Minority Leader Pelosi:

The undersigned organizations are writing to express our strong opposition to the Tax Cuts and Jobs Act and our deep concerns about its effects on the health care of older adults, people with disabilities and their families. Our organizations share a commitment to promoting access to affordable, high-quality health care and long-term services and supports for older adults, people with disabilities, and their families, and this tax package will endanger that goal.

The tax bill Congress is considering would increase the national debt by at least \$1 trillion, even after accounting for potential economic growth. The bill would also drive up the yearly deficit through tax cuts that primarily benefit the wealthiest Americans and large corporations. This is likely to lead to drastic cuts to Medicaid, Medicare, Social Security and other programs on which older adults rely. Any significant funding cuts to Medicaid would jeopardize health and long-term care for the more than 6 million low-income older adults who rely on Medicaid. In addition, significant Medicare cuts would shift costs on to beneficiaries, endangering the more than 57 million older adults and people with disabilities who rely on the program for high-quality care. Over 11 million people have both Medicaid and Medicare, and those people would be especially devastated by any such cuts.

We are also particularly concerned about the repeal of the Affordable Care Act's individual mandate, which is included in the Senate plan. Over 3.3 million adults over age 55 enrolled in marketplace plans for 2017.¹ By eliminating the individual mandate, the Senate bill puts the availability of affordable health coverage for these individuals, who are not yet eligible for Medicare, at risk through higher premiums or even lack of insurers. The Congressional Budget Office (CBO) estimates that 13 million more people will be without health coverage if the mandate is repealed, including 5 million people who would not enroll in Medicaid even though they are eligible.²

In addition to these effects, both intentional and not, the sheer size of the deficit would trigger immediate cuts under sequestration to Medicare and other programs that benefit older adults and

people with disabilities. The CBO projects Medicare cuts of \$25 billion in 2018 alone.³ Of course, such cuts would have harmful effects on all those who rely upon Medicare.

In addition to our concerns about the substance of the bill detailed above, we are also dismayed by the rushed and partisan process. It is especially concerning that further changes have been made behind closed doors and members of Congress will be asked to vote without having seen a full Joint Committee on Taxation analysis of the final bill that is in the conference report. Without a full analysis, we cannot know all the effects of this far-reaching bill.

Historically, Congress has worked through a bipartisan, transparent process that included public hearings, open comment periods on discussion drafts, multi-stakeholder meetings, and more. Any changes to the tax code should be thoughtful and deliberative.

Our organizations strongly urge Congress to start over on tax reform and ensure that any changes will not drive up deficits or reduce access to health care for older adults, people with disabilities, and their families.

Sincerely,

AFSCME
